

For Immediate Release

Business Only Broadband Announces Agreement With BITS

Westmont, IL – April 3, 2008 – Business Only Broadband (BOB), a carrier-class wireless provider for the financial sector and other large enterprise clients, announced today it will provide fixed wireless services to BITS, a subsidiary of the Atlantic Central Bankers Bank, over its MPLS network. ACBB, which is owned by more than 350 community banks throughout the five states of NY, NJ, PA, MD, and DE, provides correspondent banking services to its shareholder banks. BITS (Banking Infrastructure & Technology Services) provides managed communication services exclusively to community banks nationwide. Services include secure and encrypted Branch-To-Branch Connectivity through MPLS IP-VPNs, Hosted IP Telephony Services, Managed Secure Internet Access, and Managed Third Party Connectivity Services, delivered by two fully redundant, multi-million dollar data centers.

“Community banks are moving to next generation converged networks and as a result are heavily dependent on their data network for all voice communications and data services. A single disconnected circuit can disrupt an entire bank’s operation. Therefore, diversity in physical connectivity mediums are of significant importance to community banks,” said Chuck Daniels, CEO of BITS. “Through BOB’s microwave network solution, BITS can further enhance our customers’ network diversity to assure business continuity.”

BOB offers 100 % diverse service with no common point of failure with the Local Exchange Carrier or Competitive Local Exchange Carriers. In addition to Metro Ethernets and City-to-City connections, BOB provides the next generation of last mile providers for Internet, Extranets and point-to-point private microwave networks to assist IT professionals in the development and implementation of their business continuity strategy.

Business Only Broadband Announces Agreement With BITS – p. 2

BOB offers the enterprise marketplace four unique products. WiMAN FinanceConnect™ is a custom Extranet solution that targets financial exchanges, market data providers, and their data centers. WiMAN PrivateConnect™ offers the market a wireless Metro Ethernet solution that never has to traverse the public networks. The company's WiMAN PublicConnect™ offers business class Internet transit, along with access to multiple tier 1 transit providers at diverse data centers providing company's with a routed IP connection to vendor/suppliers and remote offices over an all wireless self-healing ring architecture.

BOB's latest innovation, WiMAN CityConnect™, connects Chicago to New York so that its enterprise customers can combine Layer 2 and Layer 3 networks in either market without traversing the public networks.

About BITS (Banking Infrastructure & Technology Services)

BITS (ACBB-BITS, LLC) is funded and fully owned by the Atlantic Central Bankers Bank (ACBB)—which is based in Camp Hill, PA and has assisted community banks in competing more effectively since being founded by over 70 community banks in 1983. Today, ACBB has over 350 community bank shareholders in PA, NJ, NY, MD, and DE and provides services to another 200 community banks. Taken together, these 500+ community banks have over 5,000 branch locations. This heritage uniquely positions BITS to provide enhanced communication

services to community banks nationwide. BITS was founded in February 2005 after receiving approval from the Pennsylvania state banking authorities and US Federal Reserve Bank.
