**Business Only Broadband Forms Technology
Partnership With Cyber Development Group**

Westmont, IL – April 22, 2008 – Business Only Broadband (BOB), a carrier-class wireless provider and Cyber Development Group, the market leader in enterprise data centers, have formed a technology partnership. Under the agreement, BOB will make its fixed wireless broadband services available to the aggregation of companies operating within Cyber Development Group’s data center campus in Mt. Prospect, Ill., giving these companies a true diverse path for co-primary network connectivity between corporate offices, trading floors and data centers.

“With our focus upon on the financial sector and other large enterprise clients, this partnership is a perfect match with Cyber Development’s client base which includes our first joint client, one of the area’s top hedge funds,” said Richard Kingston, CEO, Business Only Broadband. “One of the most critical functions for today’s enterprises is 24/7 communication to their offices, data centers, customers, and suppliers. We can help Cyber Development provide their customers with a metro area network connection that provides true diversity and facilitates 100 percent uptime.”

In addition the Business Only Broadband wireless connections have sub millisecond latency which support the high transaction financial sector requirements.

“Among the CIOs we work with, business continuity and low latency are increasing concerns,” said Jack Pressman, managing principal and chief technology officer, Cyber Development Group. “With BOB’s robust fixed wireless broadband network, we can offer our customers big bandwidth, low latency and true redundancy.”

Business Only Broadband has built the largest fixed wireless broadband networks in Chicago and New York. The networks provide true diversity in last mile connectivity by having no common interconnection or point of failure with the local incumbent and CLEC wire network. BOB uses fixed wireless technology in the licensed spectrum ranges of 11 Gigahertz, 18 GHz, 23 GHz and 80 GHz. In Chicago, the company has 30 transmission sites and over 300 customers. BOB currently offers its Chicago area customers connectivity up to 300 Megabits per second (Mbps).

BOB Forms Technology Partnership With Cyber Development Group – p. 2

Cyber Development Group has been developed from the ground up with a “best practices” approach to delivering high bandwidth / high demand business continuity services with a fundamental emphasis on providing “premier resources” within “best value” solutions.
