**Business Only Broadband Provides Cost Effective
Bandwidth for Extended Stay Hotels**

Westmont, IL – March 29, 2010 – Business Only Broadband (BOB) today announced they now provide Extended Stay Hotels with broadband wireless connectivity to the Internet for a number of the company's Chicago area locations.

Business Only Broadband's wireless network is diverse from the existing Telco, CLEC, and cable providers' infrastructure and provides highly reliable and cost-effective connectivity to the Internet. "Extended Stay Hotels saw the value of the additional economical bandwidth BOB could deliver to meet their growing bandwidth requirements," said Alan Rosenberg, CEO, Business Only Broadband.

"Cost-effective scalable bandwidth is critical for our hotels, so it is vital that we provide our guests sufficient, reliable bandwidth to meet their connectivity needs," said Ira Greenfield, vice president of technology, Extended Stay Hotels. "BOB met all of our needs and fit into our budget, as well."

Business Only Broadband owns and operates the largest, most reliable, high speed, low latency fixed wireless broadband networks in Chicago and New York.
